

Secure & Protect Office 365 Environments

Reinforce your Office 365 offering to SMBs with services that add control, security, and functionality to the fast-growing productivity suite.

Barracuda Essentials for Office 365 offers triple protection for your customers through multilayered email security, compliance archiving, and cloud-to-cloud backup capabilities.

Triple Protection for Office 365

Key Solution Advantages

- Advanced Threat Protection
- Third-party archive for compliance and eDiscovery
- Backup and recovery for Office 365
- Cloud-based central management

Fortify SMB Productivity

Companies of all sizes need an easy-to-manage, comprehensive productivity solution. They need protection against email-borne attacks, the ability to archive emails with policy-based retention and search capabilities, and automated backup and recovery for emails, attachments, and files.

Barracuda Essentials provides vital, multi-layered security, archiving, and data protection for Office 365 environments to enable your customers to prepare, migrate, and operate faster, safer, and more efficiently. With complete protection of email, data, and cloud infrastructures, **Barracuda Essentials for Office 365** helps give your customers peace of mind.

Enterprise-Grade MSP Solution

- Cloud-based email security with encryption and Data Loss Prevention
- Cloud-based archiving for compliance and eDiscovery
- PST management for faster migration
- Protection against accidental or malicious deletion

1. Email-Borne Threat Protection

The Barracuda Email Security Service includes Advanced Threat Protection to help keep email-borne attacks outside your customers' networks and provides email continuity and data leakage protection.

2. Archiving for Compliance

Barracuda Cloud Email Archiving Service integrates with Office 365 to create a cloud-based, indexed archive that enables granular retention policies, extensive search, auditing/permissions, legal hold, and export to facilitate eDiscovery and retention. Litigation holds preserve email from tampering. Native and mobile apps provide intuitive interfaces that simplify search to ensure messages are found easily, even when email services are unavailable.

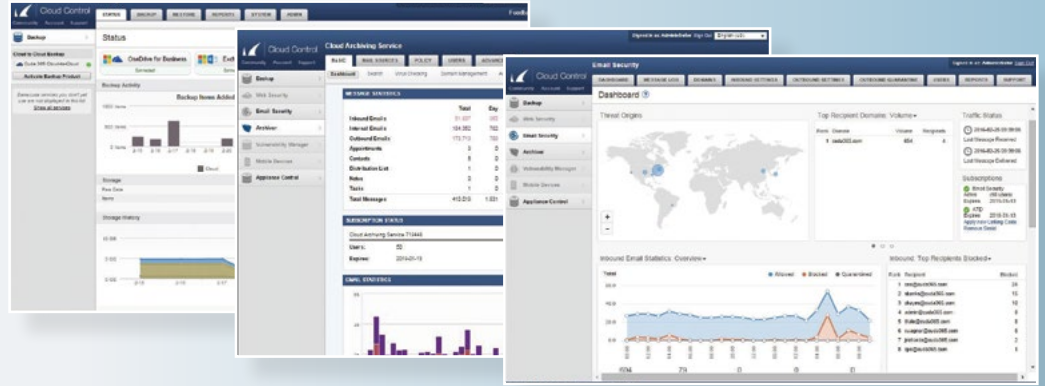

3. Automated & On-Demand Backups

While Office 365 offers scalability and redundancy to help customers mitigate natural and mechanical failures, other risks—including human error and acts of malice—can lead to irreversible data loss. Barracuda Cloud-to-Cloud Backup for Microsoft Office 365 protects Exchange Online mailboxes, OneDrive for Business, and SharePoint Online files and folders from data loss and accidental deletion.

Intuitive Management

Design consistency across Email Security, Archiving, and Backup interfaces simplifies operations while increasing solution effectiveness.

Product features

✉ Email Security

- Advanced Threat Protection
- Email encryption
- Data Loss Prevention
- Cloud-based protection against:
 - Spam
 - Email-borne viruses (inbound and outbound)
 - Email-based malware
 - Data leaks
 - Phishing emails
 - Unsecured emails
 - Denial-of-Service attacks

📄 Web-based Management

- Cloud-based central configuration and management
- LDAP and multi-factor authentication
- Centrally managed security policies
- Reports accessible from any location
- Mobile applications

📁 Archiving

- Archive directly from Office 365 to cloud-based archive
- PST management for legacy email
- Granular retention policies
- Native and mobile apps for easy access
- Full text search with multiple operators
- Standard and custom policies:
 - Foul language
 - Personal email use
 - Personally identifiable information
 - Violation alert digests
 - Legal hold

📄 PST Management

- Locates PST files wherever they exist
- Determines ownership intelligently based on content
- Discovers all PST files regardless of location or state
- Zero footprint client minimizes impact on end users
- Parallel processing avoids throttling and improves performance
- Minimizes network impact by migration directly to archive
- Selective processing migrates only data that is needed

☁ Backup

- Backup and recovery for Exchange Online, OneDrive for Business, and SharePoint Online
- Centralized administration
- Custom retention policies
- Granular scheduling and restores
- Automated or manual backups
- Multi-selection restores
- Restore back to Exchange Online, OneDrive for Business, SharePoint Online, or download files locally

🛡️ Secure Cloud Data Centers

- AES 256-bit encryption at rest and in transit
- Public key cryptography (RSA 1024)
- File name stripping
- Isolated customer metadata databases
- Redundant storage (geographic and within each colocation facility)
- Tier 3 & 4 data centers
- SSAE 16 or SOC audited data centers

▶ ABOUT BARRACUDA MSP

As the MSP-dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP platform. Barracuda MSP's partners-first approach focuses on providing enablement resources, channel expertise, and robust, scalable MSP solutions designed around the way managed service providers create solutions and do business.
