

Barracuda NextGen Firewall-MSP

Advanced Network Security Made Simple for MSPs

MSP Solution

This powerful turnkey security solution provides robust protection to secure multiple customer networks from advance threats – all from one centralized management console. Plus, the subscription-based appliance has no upfront fees.

Integrated Next-Generation Security

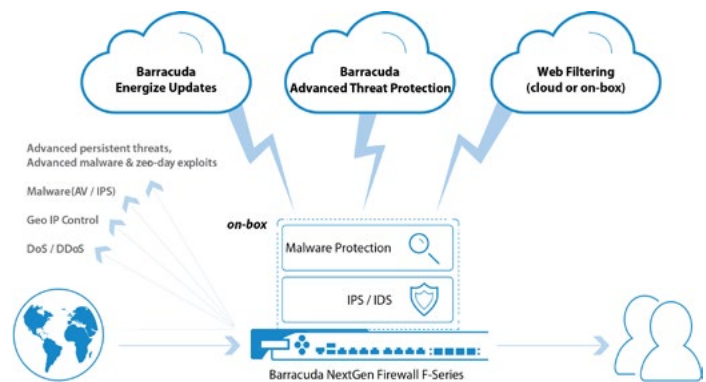

The Barracuda NextGen Firewall - MSP meets MSP requirements for reliable SMB network security and uptime. Integrated WAN optimization and dedicated centralized management of appliances enable you to increase system availability for your customers while keeping administrative time and operation cost low.

Expand Your Business

Like all Barracuda MSP offerings, Barracuda NextGen Firewall - MSP is available on an affordable monthly fixed-price basis. This extends the Barracuda MSP Difference, helping you expand your addressable market and revenue potential with no added complexity or capital cost.

Scalable Deployment

With the Barracuda NextGen Control Center, managing multiple Barracuda NextGen Firewalls across many customers takes the same amount of time as managing one. The NextGen Control Center allows MSPs to create pre-configured templates for easy rollout, have access to all the information about security deployments in real time, and easily generate reports on one or all of their Barracuda NextGen Firewall units.

Key Features

Advanced Security

Firewall - Application control and granular application enforcement; interception of SSL/TLS encryption applications

User Identity Awareness - Supports authentication of users and enforcement of user-aware firewall rules; works with a variety of authentication methods including Wi-Fi access point vendors like Aerohive, Aruba, and Ruckus

Advanced Threat Protection - Dynamic analysis of malware programs and documents with embedded exploits

Simplified Operations

Easy-to-read Reporting - Enables MSPs to create reports on all deployments or select deployments and have reports built and distributed automatically in a customized layout

Comprehensive Traffic Optimization - Intelligent traffic regulation and tightly integrated Quality of Service (QoS) and link balancing capabilities

Remote Access - Browser-based SSL VPN, dedicated VPN clients, and Network Access clients; remote access app, CudaLaunch, featuring Barracuda's Zero-Touch Deployment
