

Barracuda Intronis Backup – MSP

ConnectWise Automate Integration

MSP Solution

Overview

ConnectWise Automate is a remote monitoring and management (RMM) platform designed to give MSPs centralized visibility into their customers' IT systems. Intronis Backup provides a local and offsite backup solution for MSPs to sell to their clients. This integration streamlines daily workflows and tasks, reducing the time MSPs spend managing the Intronis Backup solution and making it easier to manage a large number of accounts more efficiently.

Streamline deployment

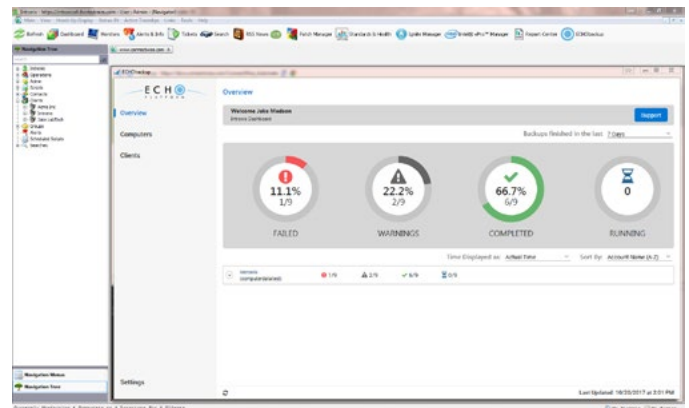

- Silently and remotely push the Intronis Backup agent to multiple machines with a single click
- Link Intronis Backup and ConnectWise Automate and see already-installed agents

Simplify management

- Create backup monitors that feed directly into Automate alerts
- View computer info (agent connectivity, software version, last backup time, cloud storage, etc.) via Automate
- Get a high-level overview of recent backups without bouncing back and forth between portals

Key Features

- Install one or more Intronis Backup agents remotely
- View essential data points in the Overview Dashboard for quick diagnostics and efficient management
- Easily monitor backup status alerts in ConnectWise Automate
- Ensure agents are connected and verify software version

About Barracuda MSP

As the MSP–dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP platform. Barracuda MSP's partner-first approach focuses on providing enablement resources, channel expertise, and robust, scalable MSP solutions designed around the way managed service providers create solutions and do business.
