

Protect VMware-based virtual environments

Overview

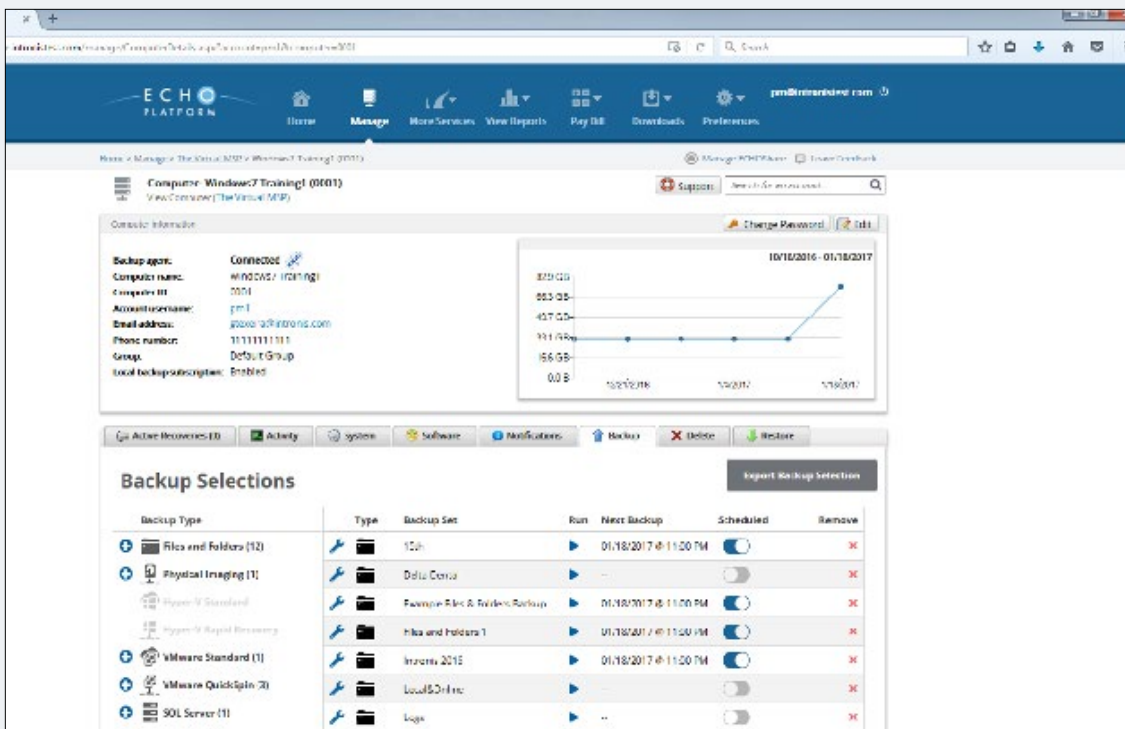

SMB adoption of server virtualization continues apace, as business owners seek to shrink IT footprints and operating costs. Yet anxieties persist about virtualization's hidden costs and risks. Fortunately, MSPs can partner with Intronis to help manage P2V migration and keep their clients' businesses running. Barracuda's support of VMware APIs allows MSPs to easily back up multiple virtual machines across multiple servers to the cloud, local storage media, or both. Barracuda Intronis Backup - MSP QuickSpin, a disaster recovery tool that allows virtual machine recoveries in minutes, lets MSPs help clients maximize system uptime.

Key Features of the Integration

- Offer customers high business availability by limiting VM downtime
- Restore VMware data locally in minutes with QuickSpin, without the need for an on-site visit or extra software
- Consolidate multiple backup and disaster recovery tools with one convenient web-based solution

Convenience

VMware backups can be managed alongside other backup types in the central Barracuda ECHOplatform - MSP. Our convenient backup status dashboard also provides real-time client assessments for easy review and resolution. QuickSpin restores can also be run straight from the portal.

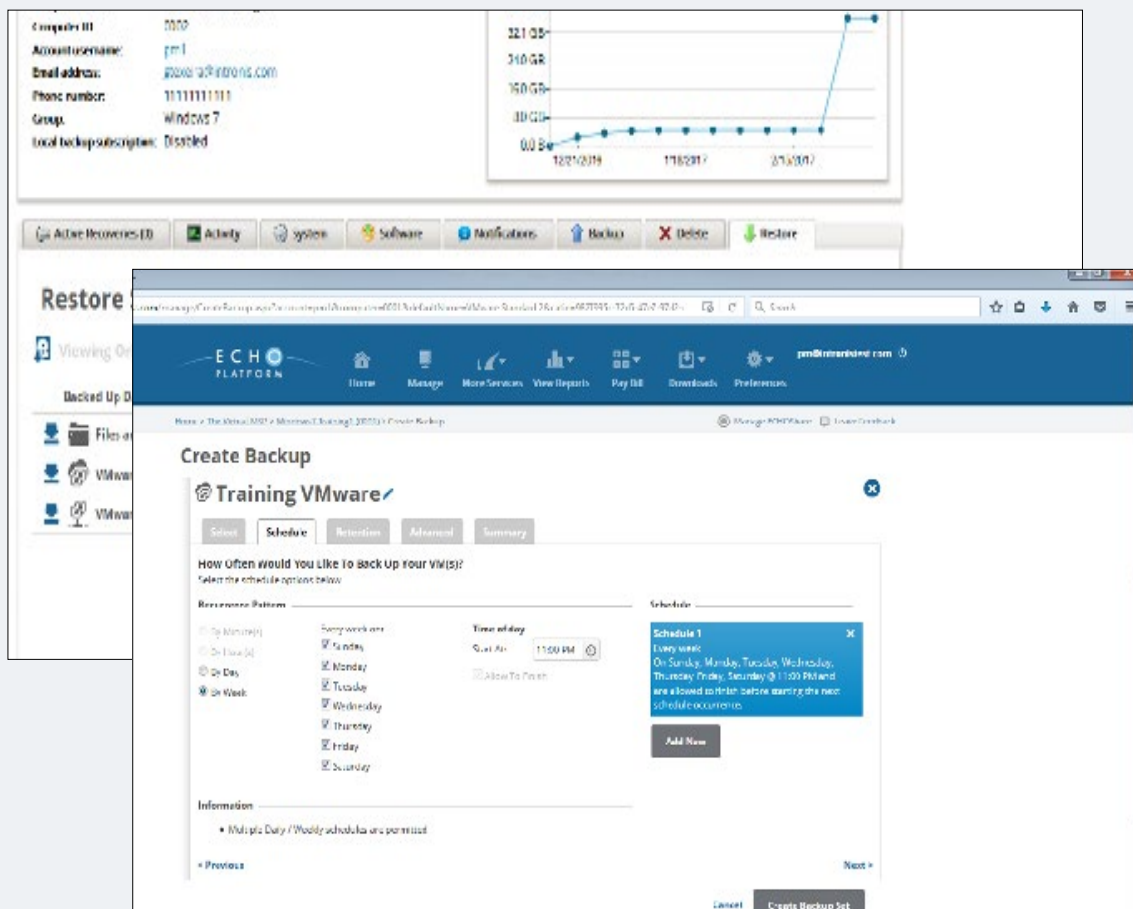

Speed

QuickSpin leverages Barracuda's Intelliblox technology to enable backup intervals as frequently as every 15 minutes, by breaking VM data into blocks and intelligently uploading only those that have been modified since the most recent backup. Faster backups and restores save MSPs time and limit downtime in the event of VM data loss.

Flexibility

With Barracuda Intronis Backup - MSP VMware backup, MSPs can back up VMs to a local device, the cloud, or both. Users can customize retention and archiving settings, and save or restore full VMs or just specific versions.

...▶ ABOUT BARRACUDA MSP

As the MSP-dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP platform. Barracuda MSP's partners-first approach focuses on providing enablement resources, channel expertise, and robust, scalable MSP solutions designed around the way managed service providers create solutions and do business.
