

# Barracuda XDR Cloud Security

Proactively monitor customer's cloud environments 24x7

By 2025, there will be over 100 zettabytes of data stored in the cloud, according to Cybersecurity Venture. With more and more companies adopting cloud services, cybercriminals are evolving their tactics to go after this attack surface. Protect customers' cloud environments with proactive monitoring to deter unauthorized access to cloud mailboxes, admin changes in the environment, brute force attacks, and more.

## Deliver cloud security services with ease

Build concentric rings of protection around customers' cloud data and user identities. With Barracuda XDR Cloud Security, MSPs can prevent attacks such as malicious admin changes, unauthorized delegate access, foreign login, cloud infrastructure attacks, and more.

## Access to security expertise

Instantly augment internal security resources with a team of tenured security experts and a best-of-breed SOC who works in the background to provide a 24x7, proactive detection and response service for all your managed customers. All identified incidents are triaged, and the MSP is alerted and guided in resolution.

## Part of Barracuda XDR multi-layered security family:

**XDR** - an eXtended visibility, Detection & Response platform that is backed by a group of tenured security experts in a 24x7 Security Operations Center (SOC), providing proactive cybersecurity-as-a-service for MSPs.

**XDR Endpoint Security** - Unifies and extends detection and response capability to endpoints, protecting them from common endpoint threats, including malware and ransomware.

**XDR Email Security** - Comprehensive email protection that includes gateway security, account compromise, and more, minimizing the impact an attack can have on your customer's email environment.

**XDR Cloud Security** - Secure your customers' cloud environments from unauthorized access to cloud mailboxes, admin changes in the environment, impossible logins, and brute force attacks.

**XDR Network Security** - Detect potential threat activity on your network such as command-and-control connections, denial-of-service attacks, data exfiltration, and reconnaissance.

**XDR Server Security** - Protect your customers critical servers from attacks such as password sprays, brute force attacks, and privilege escalation.

## Key features:

- **Detects** potential threats or suspicious activity in the cloud
- Understands attack tactics, predicts their next steps, and identifies gaps in detection coverage via detection rule mapping with **MITRE ATT&CK® framework**
- Uses **Machine Learning (ML)** to identify anomalous activity
- Merges data from your existing security tools with multiple sources to provide greater visibility
- Gains visibility of threat activity in **XDR's multi-tenancy dashboard**
- Uses **SIEM** and **SOAR** analysis
- Supports for **custom alerting** and **self-service reports**
- Includes **24x7 365 SOC** support and remediation guidance
- Backs key industry and regulatory compliance standards such as **continuous monitoring and log retention**

## Key integrations

- **Microsoft 365**
- **AWS**
- **Google Workspace**
- **OKTA**
- **And, many more**
