

Barracuda XDR Email Security

24/7/365 email protection for customers' mailboxes

Email attacks are more complex and dangerous than ever, and everyone is a target. With 91 percent of cyberattacks starting from email-based threats, businesses require email security that combines technology and human expertise for total protection. Now, you can offer comprehensive protection that is backed by an around-the-clock Security Operations Center (SOC), where a team of security analysts can simplify cybersecurity services for you, while taking a proactive approach.

Comprehensive email protection

Protect your customers' email environments with multiple layers of defense, including gateway security, inbox protection combined with artificial intelligence and machine learning technology, and a team of security experts to detect, triage, and respond to today's sophisticated email threats to minimize the impact the attacks have on your customers.

Global threat detection network

Using a global threat intelligence database and powerful A.I., Barracuda's email threat detection is combined with MITRE ATT&CK® framework mapping to ensure threats are detected early. It can even predict its next move, which helps inform the most effective response tactics.

24/7 threat detection and response

From zero-day phishing attacks to malicious business email compromises, utilizing computer vision, A.I., and machine learning, the security experts in our SOC will stop email threats from entering your customers' environments. Suspicious or malicious emails which are quarantined are documented, providing full visibility for you into customers' environments.

Part of Barracuda XDR multi-layered security family:

XDR - an eXtended visibility, Detection & Response platform that is backed by a group of tenured security experts in a 24x7 Security Operations Center (SOC), providing proactive cybersecurity-as-a-service for MSPs.

XDR Endpoint Security - Unifies and extends detection and response capability to endpoints, protecting them from common endpoint threats, including malware and ransomware.

XDR Email Security - Comprehensive email protection that includes gateway security, account compromise, and more, minimizing the impact an attack can have on your customer's email environment.

XDR Cloud Security - Secure your customers' cloud environments from unauthorized access to cloud mailboxes, admin changes in the environment, impossible logins, and brute force attacks.

XDR Network Security - Detect potential threat activity on your network such as command-and-control connections, denial-of-service attacks, data exfiltration, and reconnaissance.

XDR Server Security - Protect your customers critical servers from attacks such as password sprays, brute force attacks, and privilege escalation.

Key features

- **Protects** against spam, malware, viruses, spear phishing, and other email-based threats
- Understands attack tactics, predicts their next steps, and identifies gaps in detection coverage via detection rule mapping with **MITRE ATT&CK® framework**
- Merges data from your existing security tools with multiple sources to provide greater visibility
- Gains visibility of threat activity in **XDR's multi-tenancy dashboard**
- Uses **SIEM** analysis
- Supports for **custom alerting** and **self-service reports**
- Includes **24x7 365 SOC** support and remediation guidance
- Backs key industry and regulatory compliance standards such as **continuous monitoring and log retention**

Key integrations:

- **Barracuda Cloud Email Gateway Defense**
- **Barracuda Impersonation Protection**
- **Barracuda Incident Response**
- **And, many more**
