

Barracuda XDR Endpoint Security

Flexible, modern endpoint security with 24x7 detection & response service

Today's tumultuous cyberthreat landscape requires MSPs to provide an endpoint protection service that not only prevents threats, but can efficiently and effectively detect and respond to advanced threats such as zero-day attacks, ransomware, and more. With the Barracuda XDR Endpoint Security service, MSPs can offer comprehensive and flexible endpoint protection that gives MSPs control over the technologies used and how hands-on you'd like to be.

Simplified endpoint protection service

Available as managed and monitor-only options, MSPs can choose how hands-on they want to be to manage customer's endpoint security. Through the Barracuda XDR dashboard, MSPs have full threat visibility, alerts, and actions taken by Barracuda's SOC team.

Enhanced threat detection

Our proprietary rules are powered by machine learning (ML), are mapped to the MITRE ATT&CK® framework, allowing Barracuda's SOC team to detect threats faster, predict their next move, and readily identify where gaps may exist.

Extended security expertise

Instantly augment internal security resources with a team of tenured security experts and a best-of-breed SOC who works in the background to provide a 24x7, proactive detection and response service for all managed customers. Identified incidents are triaged, and MSPs are alerted and guided to a resolution.

Part of Barracuda XDR multi-layered security family:

XDR - an eXtended visibility, Detection & Response platform that is backed by a group of tenured security experts in a 24x7 Security Operations Center (SOC), providing proactive cybersecurity-as-a-service for MSPs.

XDR Endpoint Security - Unifies and extends detection and response capability to endpoints, protecting them from common endpoint threats, including malware and ransomware.

XDR Email Security - Comprehensive email protection that includes gateway security, account compromise, and more, minimizing the impact an attack can have on customer's email environment.

XDR Cloud Security - Secure customers' cloud environments from unauthorized access to cloud mailboxes, admin changes in the environment, impossible logins, and brute force attacks.

XDR Network Security - Detect potential threat activity on customer's network such as command-and-control connections, denial-of-service attacks, data exfiltration, and reconnaissance.

XDR Server Security - Protect customers critical servers from attacks such as password sprays, brute force attacks, and privilege escalation.

Key Features	Managed service	Monitor-only service
Endpoint security software license included	✓	
Solution configuration tuning	✓	
Single agent	✓	*Depends on the endpoint security product
Remediation, including 1-click rollback	✓	*Depends on the endpoint security product
Supports Windows, Mac, Linux	✓	*Depends on the endpoint security product
XDR dashboard	✓	✓
24x7 monitoring	✓	✓
24x7 threat detection & response	✓	✓
MITRE ATT&CK®	✓	✓

Key integrations:

Managed:

- SentinelOne

Monitor-only:

- SentinelOne
- CrowdStrike
- Cylance
- Microsoft Defender
- Trend Micro Worry-Free Endpoint Security
- And, many more
