

# Barracuda XDR Network Security

Comprehensive protection for your firewalls

84% of organizations have been breached as a direct result of a network attack in the past 12 months according to recent research. Protect your customers with Barracuda XDR Network Security that is supported by 24x7 Security Operations Center (SOC).

## Simplify network security service delivery

Leveraging existing network security technology and combining it with a proactive monitoring service that protects firewalls.

Suspected threats are correlated for analysis by Barracuda XDR Network Security and our team of experts, 24x7.

## Gain security expertise

Instantly augment internal security resources with a team of tenured security experts and a best-of-breed SOC who works in the background to provide a 24x7, proactive detection and response service for all managed customers. All identified incidents are triaged, and the MSP is alerted and guided in resolution.

## Further enhance XDR Network Security service by adding Barracuda Intrusion Detection Systems (IDS):

**Barracuda IDS** - Offers best-in-class intrusion detection with hundreds of detection rules. It standardizes network activity to enhance Indicators of Compromises (IoCs). Available as a standalone security service or in combination with existing firewalls, the Barracuda SOC team will manage Barracuda IDS to maximize network security for your customers.

## Part of Barracuda XDR multilayered security family:

**XDR** - an eXtended visibility, Detection & Response platform that is backed by a group of tenured security experts in a 24x7 Security Operations Center (SOC), providing proactive cybersecurity-as-a-service for MSPs.

**XDR Endpoint Security** - Unifies and extends detection and response capability to endpoints, protecting them from common endpoint threats, including malware and ransomware.

**XDR Email Security** - Comprehensive email protection that includes gateway security, account compromise, and more, minimizing the impact an attack can have on your customer's email environment.

**XDR Cloud Security** - Secure customers' cloud environments from unauthorized access to cloud mailboxes, admin changes in the environment, impossible logins, and brute force attacks.

**XDR Network Security** - Detect potential threat activity on customer's network such as command-and-control connections, denial-of-service attacks, data exfiltration, and reconnaissance.

**XDR Server Security** - Protect customers critical servers from attacks such as password sprays, brute force attacks, and privilege escalation.

## Key features:

- Analyzes billions of threat intelligence IoCs
- Understands attack tactics, predicts their next steps, and identifies gaps in detection coverage via detection rule mapping with **MITRE ATT&CK® framework**
- Merges data from your existing security tools with multiple sources to provide greater visibility
- Gains visibility of threat activity in **XDR's multi-tenancy dashboard**
- Uses **SIEM** analysis
- Supports **Custom alerting** and **self-service reports**
- Includes **24x7 365 SOC** support and remediation guidance
- Backs key industry and regulatory compliance standards such as **continuous monitoring and log retention**

## Key integrations

- Barracuda CloudGen Firewall
- Check Point FireWall-1
- Cisco Adaptive Security Appliance (ASA)
- Cisco Meraki
- Cisco Umbrella
- Fortinet FortiGate Firewall
- Palo Alto Firewall
- SonicWALL Firewall
- Sophos XG
- WatchGuard Firebox Firewall
- And many more
