

Barracuda CloudGen Firewall - MSP

Advanced Network Security Made Simple for MSPs

This powerful turnkey security solution provides robust protection to secure multiple customer networks from advance threats—all from one centralized management console. Plus, the subscription-based appliance has no upfront fees.

Integrated Cloud-Generation Security

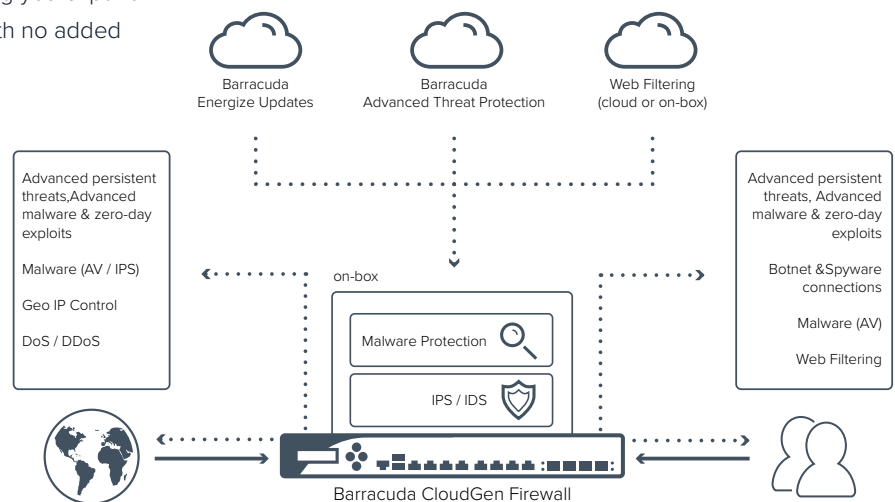

The Barracuda CloudGen Firewall - MSP meets MSP requirements for reliable SMB network security and uptime. Integrated WAN optimization and dedicated centralized management of appliances enable you to increase system availability for your customers while keeping administrative time and operation cost low.

Expand Your Business

Like all Barracuda MSP offerings, Barracuda CloudGen Firewall - MSP is available on an affordable monthly fixed-price basis. This extends the Barracuda MSP Difference, helping you expand your addressable market and revenue potential with no added complexity or capital cost.

Scalable Deployment

With the Barracuda Firewall Control Center, managing multiple Barracuda CloudGen Firewalls across many customers takes the same amount of time as managing one. The Barracuda Firewall Control Center allows MSPs to create pre-configured templates for easy rollout, have access to all the information about security deployments in real time, and easily generate reports on one or all of their Barracuda CloudGen Firewall units.

Key Features

Advanced Security

Firewall: Application control and granular application enforcement; interception of SSL/TLS encryption applications

User Identity Awareness: Supports authentication of users and enforcement of user-aware firewall rules; works with a variety of authentication methods including Wi-Fi access point vendors like Aerohive, Aruba, and Ruckus

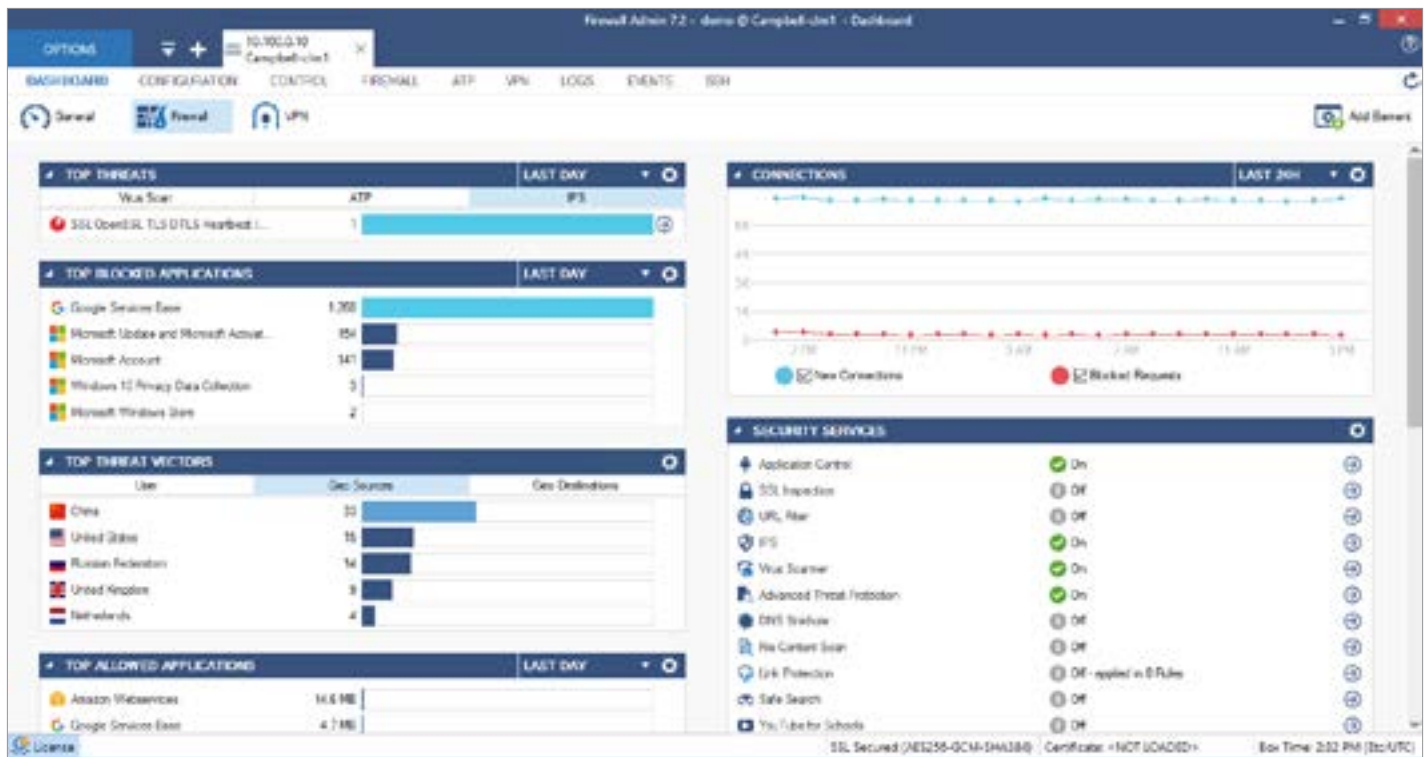

Advanced Threat Protection: Dynamic analysis of malware programs and documents with embedded exploits

Simplified Operations

Easy-to-read Reporting: Enables MSPs to create reports on all deployments or select deployments and have reports built and distributed automatically in a customized layout

Comprehensive Traffic Optimization: Intelligent traffic regulation and tightly integrated Quality of Service (QoS) and link balancing capabilities

Remote Access: Browser-based SSL VPN, dedicated VPN clients, and Network Access clients; remote access app, CudaLaunch, featuring Barracuda's Zero-Touch Deployment

Barracuda CloudGen Firewall's dashboard provides real-time information and summaries of what is going on in an organization's network.

All performance values are measured under optimized conditions and are to be considered as "up to" values and may vary depending on system configuration and infrastructure:

¹ F-12 Malware Protection is cloud-based only

² Firewall throughput measured with large packets (MTU1500) UDP packets, bi-directional across multiple ports, utilizing highest available port density.

³ VPN performance is based on 1415 Byte UDP packets, bidirectional using BreakingPoint traffic generator.

⁴ IPS throughput is measured using large packets (MTU1500) UDP traffic and across multiple ports, utilizing highest available port density.

⁵ NGFW throughput is measured with IPS, application control, and web filter enabled, based on BreakingPoint Realworld-IPS-

Enterprise-Traffic-Mix, bidirectional across multiple ports, utilizing highest available port density.

⁶ Threat Protection throughput is measured with IPS, application control, web filter, and antivirus enabled, based on BreakingPoint Realworld-IPS-Enterprise-Traffic-Mix, bidirectional across multiple ports.

Specifications subject to change without notice.

About Barracuda MSP

As the MSP-dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP management platforms. Barracuda MSP's partners-first approach focuses on providing enablement resources, channel expertise, and robust, scalable MSP solutions designed around the way managed service providers create solutions and do business.
