

GFI MAX Integration

Streamline backup management in GFI MAX RemoteManagement

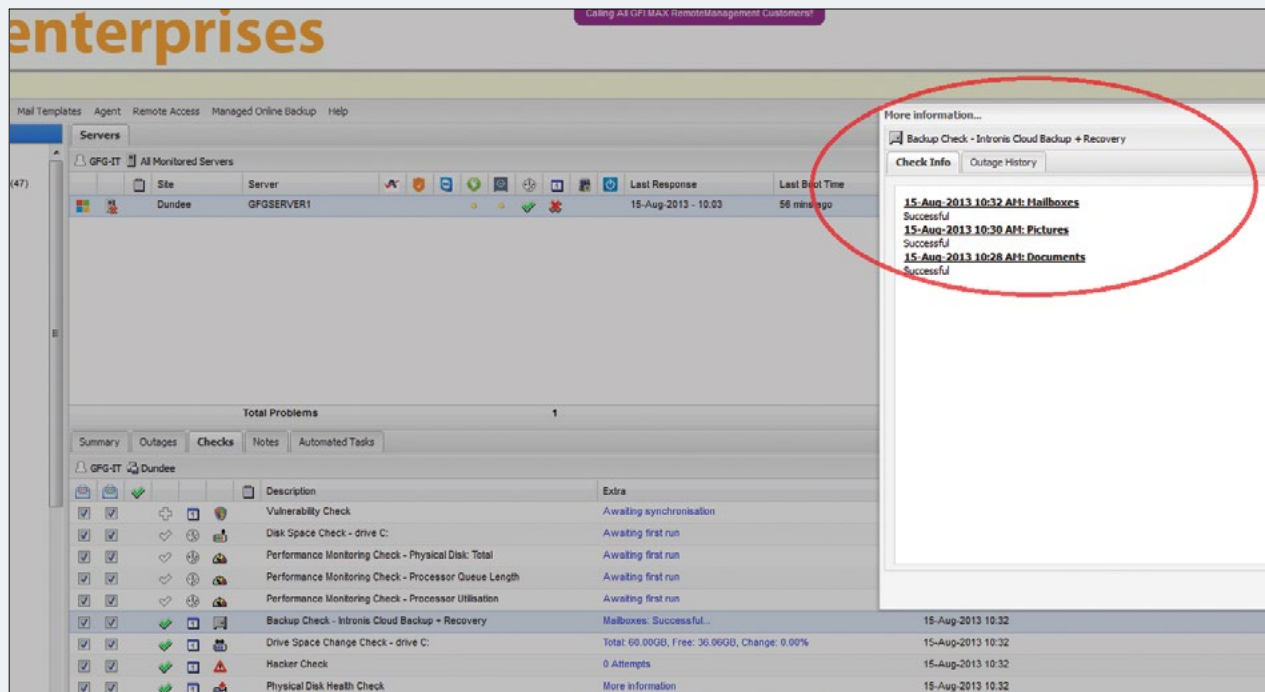

Overview

GFI MAX RemoteManagement allows MSPs and IT support providers to monitor their clients' IT environments from a single location. Intronis Cloud Backup and Recovery is a local and offsite backup solution for MSPs to resell to their clients. The integration of Intronis into the GFI MAX RMM offers MSPs seamless monitoring of backup and recovery statuses and remote deployment of the Intronis software.

Key Features of the Integration

- Real-time backup monitoring and alerts in the same place you manage other IT tools
- Automated notifications to alert you of issues as they occur
- Deploy the Intronis software agent without logging into your customer's computer

The Intronis and GFI MAX integration offers MSPs comprehensive oversight of their entire managed services environment without the need to manually perform the integration on the backend. It's a powerful tool for centrally and securely managing your clients' online backup and recovery needs alongside other IT functions, and allows you to continue to leverage your investment in tools you have already purchased.

Users of GFI MAX RemoteManagement can receive daily backup status alerts as part of the software's notification feature

Subject: GFG-IT: acme enterprises Daily Safety Check

Client Confidence Note Date generated: 15 Aug 2013 10:03:59AM

As part of our commitment to top tier service, we've conducted our Daily Safety Check on your systems this morning.

The checks identified one or more errors in your systems.

Details:

-  Site: Dundee
-  Device: GFGSERVER1 - Backups - (Last Daily Safety Check: 15 Aug 2013 10:03 AM)

| | | | |

▶ ABOUT INTRONIS MSP SOLUTIONS BY BARRACUDA

Intronis MSP Solutions by Barracuda is the first single-source vendor to combine security and backup solutions tailored specifically for managed service providers. Intronis enables MSPs to centrally deploy and manage a broad portfolio of services, protecting business-critical files, folders, email, applications, servers and networks — both locally and in the cloud — through a single-pane-of-glass management console. MSPs benefit from core PSA and RMM integrations, as well as a true partnership with Intronis, through fixed pricing plans and partner enablement tools that help MSPs accelerate growth and increase profits.
