Intronis Backup

MSP Solution

Barracuda Intronis Backup - MSP includes a **native Hyper-V backup** solution that allows you to **protect virtual machines** from the same web-based platform you use to back up the rest of your data. Intronis Backup support of Microsoft APIs allows MSPs to **easily back up multiple virtual machines** across multiple servers to the cloud, local storage media, or both.

Complete Protection for Virtual Machines

Centralize Your BCDR

Partners can manage Hyper-V virtual machines right from the Barracuda ECHOplatform - MSP, our convenient central management console. With a single platform, IT solutions providers can create backup sets for a wide variety of data types, including Hyper-V virtual machines.

Expand Your Virtual Services Footprint

Barracuda Intronis Backup offers native data backup for both Hyper-V and VMware from a single platform. That makes Intronis Backup a cost-effective solution for partners who want to grow their data protection capabilities without spending extra time or money running a separate virtual backup solution.

Flexible Recovery Options

With a few clicks, you can recover any number of Hyper-V virtual machines protected in the Barracuda cloud or your local storage environment. Each recovered Hyper-V virtual machine includes all virtual hard disk and VM configuration files restored to its own VM folder, allowing you to recover virtual data the way you want.

- **Import to Hyper-V** — Select the desired VM folder and import directly to Hyper-V
- **Object-level restore** —Explore and extract specific files quickly, with no need to mount VHDs
- **Fast RTO** — Recover Hyper-V virtual machines from local storage in minutes

Backing up Hyper-V

Secure Protection for Multiple VMs

Provide complete protection for all of your clients' virtualized data. Back up any number of Hyper-V virtual machines on a single hypervisor through the Intronis Backup agent installed on that host. We support Hyper-V on Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2, and Windows Server 2016.

Local and Cloud Backup

Cover all of your bases by storing Hyper-V backups locally, in the cloud, or both. Cloud backups are stored encrypted for maximum security.

Fast Hyper-V VM recovery

Keep your clients up and running with Hyper-V Rapid Recovery, a feature that lets you back up full Hyper-V VMs to local storage, and restore them in minutes.

Unlimited Historical Versions

Enjoy efficient long-term backup with the same granularity as other data types. Our Hyper-V plug-in for Intronis Backup enables you to store unlimited historical versions of your clients' virtual machines.

About Barracuda MSP

As the MSP-dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP platform. Barracuda MSP's partners-first approach focuses on providing enablement resources, channel expertise, and robust, scalable MSP solutions designed around the way managed service providers create solutions and do business.
