

Managed CloudGen Firewall

Advanced Network Security Made Simple for MSPs

The Managed CloudGen Firewall service enables you to offer robust, comprehensive network security protection to your customers. Our MSP Professional Services team configures, monitors, and manages the firewalls, freeing up and supplementing your resources for your customers.

Why CloudGen Firewalls

- **Advanced Threat Protection, including sandboxing** — Dynamic analysis of malware programs and documents with embedded exploits
- **Comprehensive traffic optimization** — Intelligent traffic regulation and tightly integrated Quality of Service and link balancing capabilities
- **Intrusion detection and prevention** — Comprehensive, real-time protection against exploits, threats, and vulnerabilities

What's included

An experienced team of technical professionals will provide:

- Configuration of firewalls based on customers' preferences
- 24/7/365 security event management
- Notification of any qualified threat and its remediation
- Alerts of any communication disruptions from onsite equipment to our monitoring system
- A monthly consolidated report on equipment traffic and application usage
- Access to an exclusive MSP phone support line

Why Managed CloudGen Firewalls

- Expand (or launch new) security services with Advanced Threat Protection
- Replace your legacy firewalls without retraining your techs
- Create and deliver rebrandable reports and metrics that will highlight your security service effectiveness

What to expect

Our team will:

- Migrate your firewall policies from any legacy solution
- Conduct remote installation services (pre-schedule required)
- Activate and configure the firewall(s)
- Set up security event notifications

Once you have purchased, received, and racked your firewall(s):

- Call our MSP Professional Services Team
- Participate in a kickoff call to begin firewall configuration
- Identify your internal point-of-contact information for any questions or updates
- Receive regular alerts, notifications, and monthly reports from our team
