

# Managed PhishLine

## Real-World Phishing Simulation and Security Awareness Training

### MSP Solution

With **Managed PhishLine**, you help safeguard your customers through interactive phishing simulation and security awareness training, and our team takes care of the campaign management and reporting.

Through this service, you can teach your customers' employees how to spot, avoid, and report real-world attacks. We will help you move away from one-time tests and redundant analysis to a more comprehensive, ongoing anti-phishing program.

### Why Barracuda Phishline

**Security Awareness Training** — PhishLine's real-world multi-variable testing creates mock-phishing campaigns that teach your customers' users to recognize the threat, not a template. The interactive campaigns use a mix of links, Smart Attachments, videos, graphics, and training materials to create impactful educational experiences.

**Robust Reporting** — Get regular insight into who's clicking on what, which will help you identify the levels of risk within your customers' organizations

### What's Included

An experienced team of technical professionals will provide campaign creation, oversight, and reporting, including:

- Monthly campaigns created and managed by a dedicated consultant
- A mix of phishing simulation emails and interactive training materials
- Regular reports, branded with your logo, that you can share with each of your participating customers
- Access to dedicated MSP phone support

### Why Managed PhishLine

- Easily provide enhanced security awareness training to your customers without added work for your technicians
- Maximize the value of the service while saving time
- Deliver regular reports that highlight the value and effectiveness of security awareness training

### What to Expect

Our team will:

- Create and execute monthly phishing or security awareness campaigns
- Provide regular activity reports

Once you have purchased Managed PhishLine and received your welcome email, simply:

- Send our Managed PhishLine team a list of the end-user email addresses you would like to receive the monthly campaigns, and a copy of your logo for branding reports
- Follow instructions provided by our team to set up any necessary whitelisting in your customers' systems
- Identify your internal point-of-contact information for any questions or updates
- Receive regular notifications and reports from our team
