

Barracuda Intronis Backup - MSP

Solarwinds MSP N-central Integration

MSP Solution

Overview

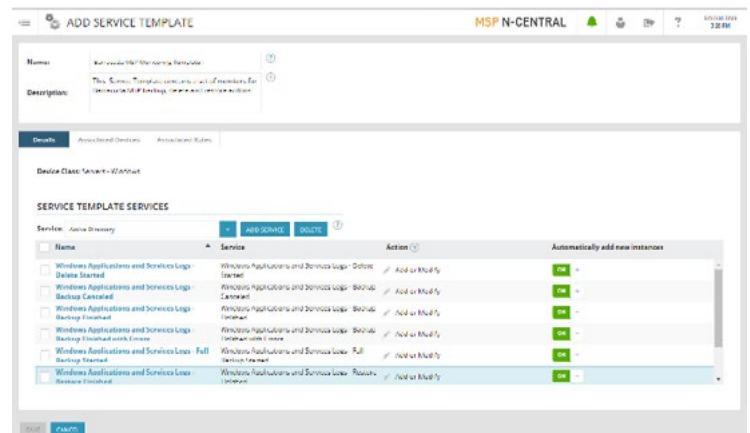

Solarwinds MSP N-central (formerly N-able) gives MSPs the ability to monitor and manage their clients' computers remotely through a centralized interface and automated alerts. Barracuda Intronis Backup - MSP provides a local and offsite backup solution for MSPs to sell to the very same customers. Our integration with N-central's monitoring solution allows seamless tracking of backup and recovery statuses, as well as remote deployment of the Barracuda Intronis Backup - MSP software.

Key Features

- Configure automated alerts for backup and recovery events in the Windows Event Logs
- Remotely manage multiple customer accounts in real-time
- Simplify workflows and improve accuracy across your managed service business

Benefits of the Integration

- Barracuda Intronis Backup - MSP integrates with N-central so MSPs can spend less time on administrative tasks and more on growing their businesses.
- MSPs can deploy the software without logging into a customer's computer

About Barracuda MSP

As the MSP-dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP platform. Barracuda MSP's partner-first approach focuses on providing enablement resources, channel expertise, and robust, scalable MSP solutions designed around the way managed service providers create solutions and do business.
